Beclawat Manufacturing Inc.
175 Everett St
Picton, ON K0K3E0

I have the qualifications and related skills you are looking for in an employee. I am flexible to work a variety of shifts, have my own reliable transportation and have my own safety boots.

As a graduate of the Mechanical Techniques certificate program and a current student in the Manufacturing Engineering Technician program at Loyalist College, I am well prepared to work in the manufacturing industry. During my program I gained the ability to analyze and solve technical problems, interpret and prepare technical documents, use computer software to support the engineering environment and to collect relevant information, data, and materials. I have also gained strong CAD skills, an understanding of machine design, tool control and developmental, and knowledge of manufacturing principles. As a detail oriented individual with excellent mathematical skills, I can read and interpret technical blueprints to ensure accuracy and efficiency of engineering projects.

In addition to my education background, I am a team player who communicates effectively with all levels of management. You can rely on me to take initiative, work in a safe manner to ensure the safety of myself and my team while always working hard to get the job done.

I look forward to hearing from you in the near future to schedule an interview at your convenience. If you have any questions or concerns, please feel free to contact me at 613-476-2245 or sean.michaels@msn.ca anytime. Thank you for your time and consideration.

Sincerely,
Sean Michaels
